Channels · Panels

Product catalog 2026

Draw any profile. Any size. Any color.

Once you have a Crestline login, you are not limited to our standard shapes. Draw your own profile right in the portal: type the size of each side and the angle of each bend, watch the drawing and the 3D preview update, pick the color, gauge and lengths, and add it to your order. We bend it.

1

Draw it

Sides, sizes, bends, kicks and hems.
The drawing updates as you type.

2

Choose it

Color, gauge, length and number of
pieces, with a 3D preview.

3

We bend it

It goes straight to our shop. Track it
from received to ready.

ABOUT CRESTLINE

Bent to order. Most profiles in 1 day.

Crestline Sheet Metal is the sheet metal arm of Bolton Cladding. We bend coping, flashing, drip edge, window sills, gutters and channels in .032 and .040 aluminum, and every piece is cut to your sizes. Most standard profiles are ready in 1 day.

Standard shapes, or draw your own

Pick a shape, a color and the lengths you need. Need something special? Log in and draw your own profile in the customer portal, or send us a sketch, and we will bend it.

One team with Bolton & Panel Decor

Order your trim with your panels: Bolton fabricates the panels, Panel Decor installs them, and Crestline bends the metal to match, on the same schedule.

Standard profiles. Don't see your shape? **Log in and draw any profile**, any size, any color, and we bend it.

ROOF EDGE

Coping

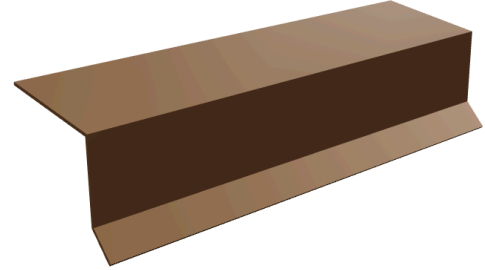

Wall cap · cleats included

A protective cap along the top of walls and parapets that keeps water out of the wall and gives the roof line a clean, finished edge.

- Parapets and wall tops
- Flat and low-slope roofs
- Cleats included with every order

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

ROOF EDGE

Drip edge

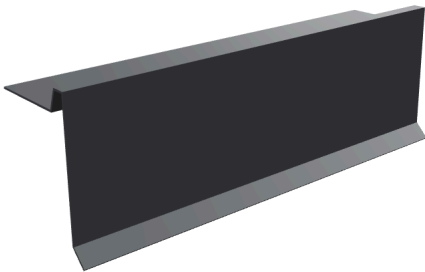

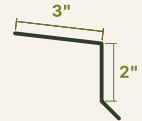

Roof edges

An angled edge installed over the fascia board that sends water off the fascia and into the gutter.

- Shingle and membrane roofs
- Over fascia boards
- Into gutters

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

ROOF EDGE

Gravel stop

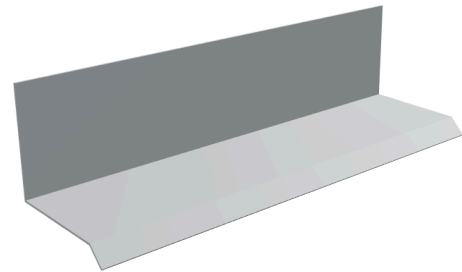

Flat roof edges

A flat-roof edge with a raised lip that holds ballast and membrane in place and closes off the roof edge.

- Built-up and ballasted roofs
- Membrane terminations
- Fascia cover

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

ROOF EDGE

Flashing

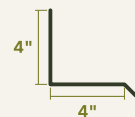

Custom angles & kicks

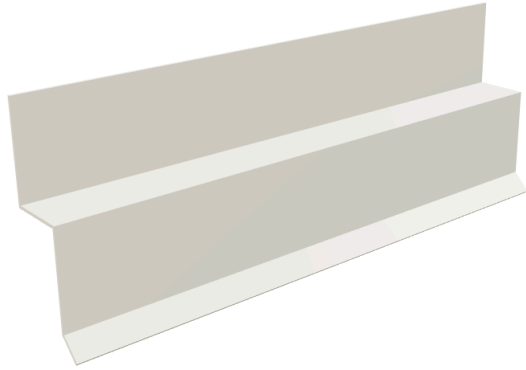

Thin metal that directs water away from joints, seams and penetrations. Any angle, any kick, bent to your sketch.

- Roof-to-wall joints
- Penetrations and curbs
- Counter flashing

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

WALLS & OPENINGS

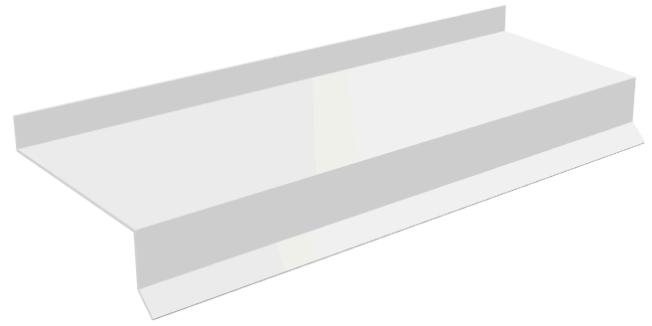

Z-flashing**Panel & siding joints**

A Z-shaped flashing that laps behind the upper panel and over the lower one, so water at horizontal joints runs out, not in.

- Horizontal panel joints
- Siding transitions
- Over windows and doors

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

WALLS & OPENINGS

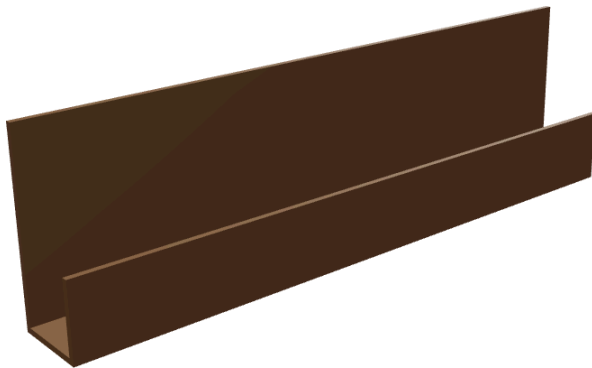

Window sill**With or without kick & hem**

A sloped metal sill that drains water away from the window and the facade, made to match your cladding.

- Window and storefront sills
- Matches the panel color
- Any depth and length

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

WALLS & OPENINGS

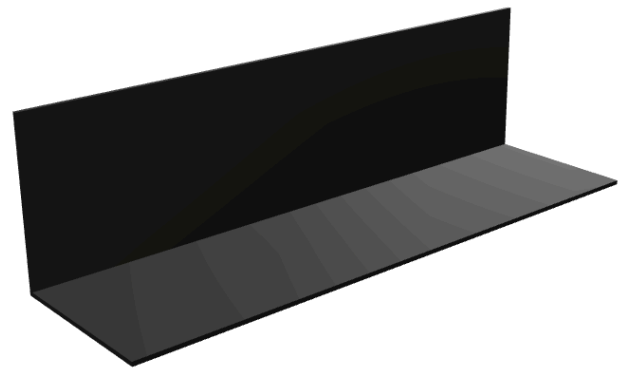

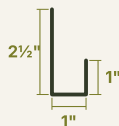

J & U channel**Panel edges & trim**

Trim channels that capture and finish the cut edges of panels at openings, corners and terminations.

- Panel terminations
- Window and door returns
- Soffit edges

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

WALLS & OPENINGS

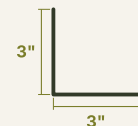

L-angle**Corners & closures**

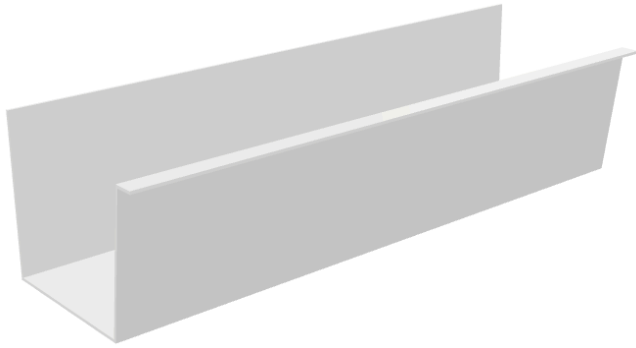

A simple, straight angle for outside corners, closures and base trim, in any leg size.

- Outside corners
- Base and top closures
- Equal or unequal legs

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

DRAINAGE Gutters

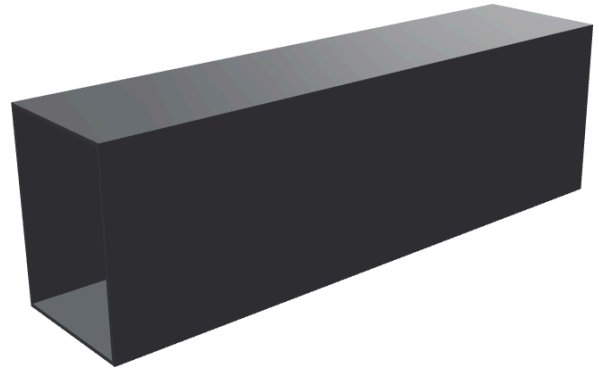

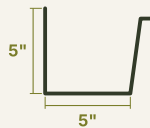

Box gutters, made to fit

Box gutters bent to your size and color, with matching leader pipe and elbows.

- Box and custom gutters
- Matching leaders and elbows
- Commercial and residential

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

DRAINAGE Leader pipe

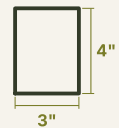

Leaders & elbows

Rectangular leader pipe that carries water from the gutter to the ground, with elbows to match.

- Downspouts
- Elbows and offsets
- Matches the gutter color

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

PANELS Corrugated

Roofing & siding

Wavy, ribbed sheet metal that is strong, light and fast-draining, for roofs and walls.

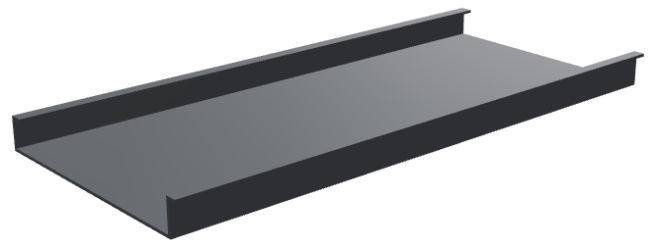

- Roofing and siding
- Light and cost-effective
- Many finishes

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

Corrugated profile · sheet width to order

PANELS Standing seam

Hidden-fastener panels

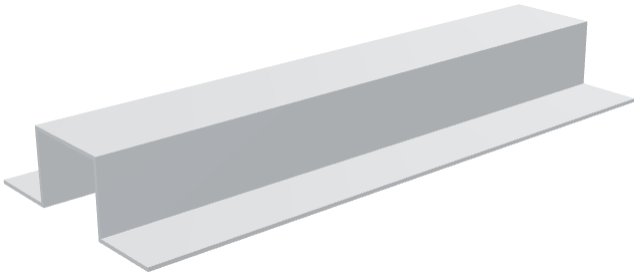

Panels joined at raised, interlocked seams with the fasteners hidden under them, for roofs and walls.

- Steep roofs
- Wall cladding
- Concealed fasteners

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

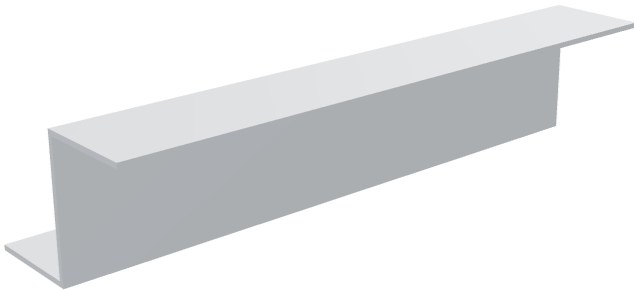

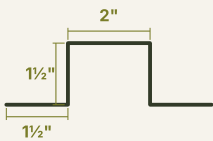

FRAMING
Hat channel
Rainscreen framing

Hat-shaped furring that creates the air gap behind rainscreen panels and gives them a straight, solid base.

- Rainscreen sub-framing
- Furring over sheathing
- Panel attachment

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

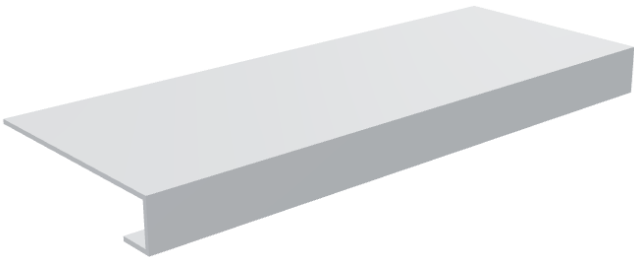

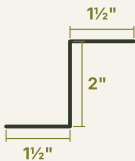

FRAMING
Z-channel
Panel & rainscreen framing

Z-shaped girts for panel and rainscreen framing. Bolton buys its own Z-channel from Crestline.

- Panel sub-framing
- Insulated wall girts
- Any depth

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft

SIDE VIEW

FRAMING
Cleats
Hidden fastening

Continuous and clip cleats that lock coping and edges in place without exposed fasteners.

- Coping cleats (included)
- Continuous edge cleats
- Galvanized or aluminum

Made to your sizes · .032 / .040
aluminum · lengths up to 10 ft
